UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF BIOLOGICAL SURVEY
Washington, D.C.

October 4, 1934.

Memorandum Regarding the Use of Medical Facilities Prescribed
by the U. S. Employees' Compensation Commission in Case
of Injury in Performance of Official Duties

TO SURVEY MEMBERS:

All employees of the Survey should have in their possession a copy of C. A. 76, "Medical Facilities," and also C. A. 22 containing regulations of the U. S. Employees' Compensation Commission. Should there be those who have not received copies of these publications or who do not have on hand forms C. A. 1 and C. A. 2 required in the reporting of injuries occurring in connection with official duties, these should be requisitioned through the Bureau.

The disallowance by the U. S. Employees' Compensation Commission of a claim from a Bureau employee, for the reason that a private hospital and private physicians were employed by the injured employee rather than the hospital and physician prescribed by the Commission in their Publication C. A. 76, makes it necessary for Bureau personnel to avail themselves of the prescribed facilities if they hope to be reimbursed for expenses incurred in connection with any injury sustained in the performance of official duties.

W. Dillon

In Charge,
Division of Administration.
